PERSONAL PROJECTS

Smart Blood Bank Portal (SBBP) (07/2023 - 11/2023)

- SBBP is created for my better understanding about MERN stack i got the idea about how to work with API, node.js and MongoDB. Also got to know how to work with components, React-Router, Different datas and axios in react.js.

University Admission Management System (UAMS)
(02/2023 - 06/2023)

- Created this project during my master's degree to get better understanding of Vue.js, Node.js, MongoDB, HTML, CSS, JavaScript etc.
- Built on MEVN, Online Admission System, Which provide online Admission of Student. It is easy process within single click all the details fill automatically instead of enter manually like personal details, education details and revenue details

Online Newspaper System (09/2022 - 11/2022)

- Built on MEVN, An online newspaper (or electronic news or electronic news publication) is the online version of a newspaper, either as a stand-alone publication or as the online version of a printed periodical.
